PROFILE SUMMARY

A highly motivated Frontend Developer with over 2+ years of experience in building dynamic and responsive user interfaces. Proficient in modern frameworks and libraries like React.js, Vue.js, and AngularJS. Skilled in crafting pixel-perfect designs using HTML, CSS, Bootstrap, Tailwind CSS, and JavaScript to deliver seamless user experiences.

TECHNICAL SKILLS

- ReactJS
- Vue.js
- Angular.js
- HTML | CSS
- Bootstrap
- Tailwind CSS
- Javascript
- Core Java | Oracle SQL
- Git

PROFESSIONAL EXPERIENCE

Quantumberg Technologies Pvt Ltd   **Mar 2024 - Present**
Associate Software Engineer

- Frontend Developer at QuantumBerg HRMS, utilizing Vue.js, HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, and Pinia for state management.
- Designed and developed a comprehensive HRMS platform enabling user registration, manual credential delivery, and login functionality, designating users as company admins.
- Created an admin dashboard with features to manage company settings, upload logos, add and update employee details, view employee metrics via ApexCharts, and manage designations, shifts, news, and holidays using AG Grid.
- Built bulk employee upload via CSV and organizational chart views. Implemented robust leave management for granting leaves, adding leave types, and initiating employee exit processes.
- Developed an employee dashboard showcasing shift details, attendance, leave balances, holiday calendars, and organizational news.
- Enabled employees to apply and withdraw leaves, view attendance summaries, regularize attendance, and request resignation with status tracking.
- Integrated manager-specific functionalities for leave approvals, calendar scheduling, and shift rostering.
- Utilized Pinia to securely manage employee emails, roles, and JWT tokens in local storage, enhancing application security and efficiency.

NSEIT Ltd   **Mar 2022 - Jun 2023**
Trainee Associate System Analyst

- Successfully developed a Resource Monitor UI for NSE India using Angular.js.
- The project involved creating essential web pages, including login, dashboard, and logout.
- To visualize real-time system metrics, integrated Chart.js library to display dynamic graphs for CPU and Memory Usage trends.
- Implemented efficient data flow between the frontend and backend, ensuring seamless communication and data updates.
- Additionally, I developed a log window to present system logs effectively.
- Ensured the UI was fully responsive across different devices and maintained high-quality code by following best practices, including regular code reviews.

INTERNSHIP

Walkin Software Tecnhologies   **Oct 2020 - Nov 2020**
Web Developer
- The Project Apartment Visitor Management system is a web-based technology that will revolutionize the way your society manages visitors and provide visitor pass to them.
